Agrovista Machine Control

The Agrovista Machine Control (AMC) is our new GPS system.

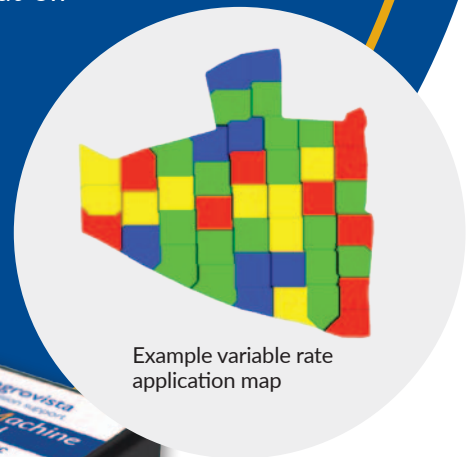

Load your variable rate maps and let the AMC take the reins as you drive around the field.

With variable width and adaptive rate control, and an added option for guidance, the AMC is a cost-effective solution for most tractors and applicable equipment.

There is also an option for the AMC variable rate only system.

Features

- Compact 7" LCD display
- Guidance option
- Built-in terrain compensation
- Headland guidance
- Straight line and curve AB lines
- Field area measurement and field recognition
- Wi-Fi and Bluetooth connectivity
- Job recording
- Optional auto shut-off
