insight

Your farm data platform

User-friendly dashboard providing updates and news for your farm

Precision mapping

- Whole farm view of all your data
- Navigate to field option to help contractors find your fields
- Improved zoning functionality
- View data for any precision services carried out on your farm
- Add notes to your fields
- Manually draw zones for variable applications
- Measure areas and lengths and store them by category
- Download your application data

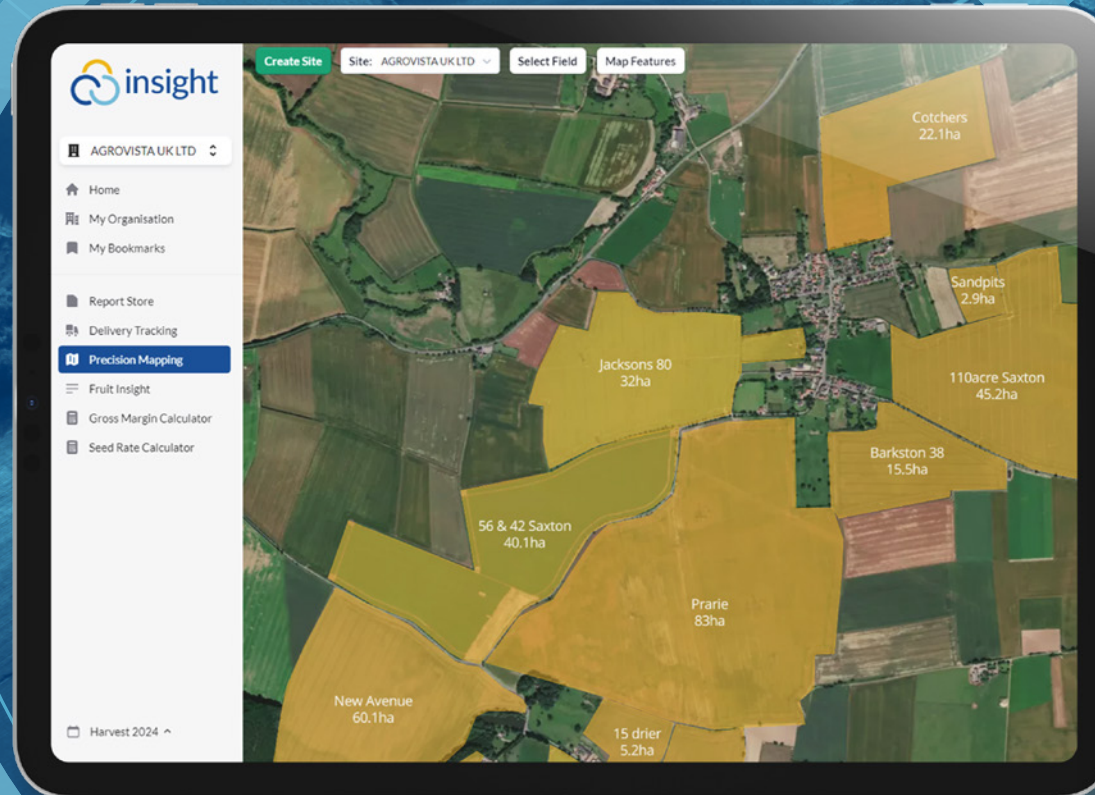

Delivery notifications

- Track delivery status and delivery time slot
- View which products are on the delivery
- See where it has been delivered

Your farm data platform

Report store

- Contains all reports associated with your business: Nutrient, soil and manure management plans, leaf tissue analysis, soil and manure analysis, precision reports
- Links directly with Yara Lancrop to automatically create lab reports
- Includes tags to assist when looking for audit data e.g. Red Tractor or SFI audit filter

Management reports

- The first step to automated management reports
- Pulls data from your agronomy software giving you the ability to edit your data
- Enables accurate and prompt Rural Consultancy reports generated from your data

Weather app

- View forecasts
- Weather station data
- Disease risks

Additional features

Gross margin calculator, Seed rate calculator, Customisable bookmarks, 'My organisation' - Share your data within your business.
