# Mobile seed cleaning

#SeedTheDifference

# Agrovista offer the latest innovations and highest quality service in mobile seed operations

- Large capacity units equipped with high specification treaters
- Full range of seed treatments
- Permanent, experienced and qualified staff in all aspects of processing and treatment application
- Bulk cleaning
- Bushel weight and Hagberg improvement
- Full range of seed testing for cereals, oilseeds and pulses

**#SeedTheDifference**

The seed mobile machines incorporate continuous flow dressing systems, fully automated seed treatment application technology and highly accurate electronic weighing units. **This provides the ability to monitor and apply seed protection products accurately and in a cost-effective way.**

The mobile units allow for specific varieties and quantities to be treated, giving greater flexibility for the grower in product choice and batch size.

Agrovista can also help you tailor your crop protection inputs to individual varieties, or even fields. We do this by applying the recommended treatment for specific roles with the opportunity to pack to customer's criteria in relation to drill capacity.

**We offer treatments for**

- ✓ Take-all
- ✓ Wheat bulb fly
- ✓ Manganese
- ✓ Seed borne disease
- ✓ Anti-virus strategy
- ✓ Insect control strategy
- ✓ Enhanced establishment

**The mobile can clean and dress all seeds including**

- ✓ Cereals
- ✓ Peas
- ✓ Beans
- ✓ Oilseed rape
- ✓ Linseed
- ✓ Small seeds

*They have achieved some impressive throughputs, dressing and cleaning up to 73 tonnes in a single day*

# Our treatments

## Redigo Pro (Bayer)

### Application rate

0.5L/t on winter wheat, 0.67L/t on spring wheat, winter barley, spring barley, winter oats, spring oats, rye, triticale

### Disease controls

Fusarium, bunt, loose smut, blue fungus, covered smut, leaf stripe. Limited evidence suggests Redigo Pro reduces the germination of ergot.

### Active ingredients

Prothioconazole and Tebuconazole

### Emergency telephone number

0800 1020 3333

*Must be applied within the season of application*

## Beret Gold (Syngenta)

### Application rate

2L/t on wheat, barley, oats, rye, triticale

### Disease controls

Fusarium, septoria, seedling blight, stem based browning, common bunt, snow mould, covered smut, partial control of leaf stripe

### Active ingredients

Fludioxonil

### Emergency telephone number

01484 538 444

## Raxil Star (Bayer)

### Application rate

0.5L/t on winter barley

### Disease controls

Loose smut, covered smut, leaf stripe, net blotch

### Active ingredients

Fluopyram, Prothioconazole and Tebuconazole

### Emergency telephone number

0800 1020 3333

*Must be drilled within 7 months of application and within the season of treatment*

## Vibrance Duo (Syngenta)

### Application rate

2L/t on wheat, barley, winter rye, winter triticale, 1L/t on spring oats

### Disease controls

Fusarium, septoria, common bunt, snow mould, covered smut, loose smut

### Active ingredients

Fludioxonil and Sedaxane

### Emergency telephone number

01484 538 444

# Our treatments

## Rancona Imix (UPL)

### Application rate

1L/t on wheat, barley

### Disease controls

Loose smut, leaf stripe, seedling blight, suppression of ergot, bunt

### Active ingredients

Ipconazole and Imazalil

### Emergency telephone number

01235 239 670

## PREPPER®

## Prepper (Certis)

### Application rate

2L/t on winter and spring crops of wheat, barley, oats, rye, triticale.  
4L/t on peas, beans

### Disease controls

Fusarium, septoria, seedling blight, stem based browning, common bunt, snow mould, covered smut, partial control of leaf stripe

### Active ingredients

Fludioxonil

### Emergency telephone number

0870 190 6777

## Latitude (Certis)

### Application rate

2L/t on winter wheat, spring wheat, winter barley

### Disease controls

Take all

### Active ingredients

Silthiofam

### Emergency telephone number

0870 190 6777

*Should be drilled in the season of application. Storage of latitude treated seed can adversely affect the performance of the seed for the next season*

## SIGNAL® 300 ES

## Signal 300ES (UPL)

### Application rate

2L/t on wheat and barley (must be drilled before 31st January)

### Pest reduction

Wireworm, wheat bulb fly

### Active ingredients

Cypermethrin

### Emergency telephone number

01235 239 670

*Should be drilled in the season of application*

# Our treatments

## KICK-OFF

### Kick off (Fielder)

#### Application rate

2.5L/t on wheat, barley, oats, triticale, rye and 3.5L/t on OSR

#### Active ingredients

Nitrogen, phosphorus pentoxide, potassium oxide, sulphur, manganese, zinc, amino acids

#### Emergency telephone number

01743 860 924

*Benefits – Improves speed of germination, works with soil biology to improve nutrient uptake, improves the ability of the plant to tolerate stress, enhances and forms deeper rooting, maximises yield potential.*

## Manganese Trio ST

### Manganese Trio ST (Fielder)

#### Application rate

5L/t on wheat, barley, oats, triticale, rye and 8L/t on OSR

#### Active ingredients

Manganese, sulphur, copper and zinc

#### Emergency telephone number

01743 860 924

*Benefits – Improves the speed of germination, increases crop biomass and overall plant health, can reduce the need to apply early-season foliar manganese.*

### Voltek ST (Unium)

#### Application rate

1L/t on all crops

#### Active ingredients

Metabolite nutrient complex, phosphite, keto acids and additional nutrients

#### Emergency telephone number

01430 431 867

*Benefits – Maximises emergence, uniform germination, quicker establishment, enhanced root and shoot biomass, maximise nutrient efficiency, provides essential nutrients, optimal tiller initiation, reduced risk to environmental stress, maximise green leaf area and optimises ear numbers, grains/ear and yield.*

## Integral® Pro

### Integral Pro (BASF)

#### Application rate

1.6L/t on winter oilseed rape

#### Disease controls

Useful reduction in stem canker (Phoma lingam); stimulation of plant natural defences can provide a useful reduction in crop damage from cabbage stem flea beetle

#### Active ingredients

Bacillus amyloquefaciens  
2.2 x 10<sup>10</sup> cfu/m

#### Emergency telephone number

00491 802 27312

# Our seed mobile bases

We have a long standing relationship with our growers in East Anglia, Midlands, Yorkshire and the North East and for many decades have worked alongside each other, to make sure they have quality cleaned and dressed seed, ready to be drilled in one of the busiest times of the farming calendar.

We're investing in new machines to make sure we can continue to keep up this level of service for existing customers and demand from new growers.

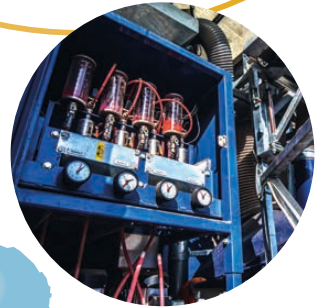

We're members of the NAAC (National Association of Agricultural Contractors) and adhere to safe practices on farm.
